

Virtual Cloud Arena

Quality cyber training,
at your fingertips

Remote learning environment via virtual training ground

Online access for multiple users to a cyber training program tailored to the skill and experience of teams across your organization.

Hands-on experience

Supported by our White Team experts, trainees must defend against a range of cyberattacks, based on real-life scenarios and adapted to your actual work environment, infrastructure and technology.

Real-time & post-training feedback

Training is powered by our Red Team of hacking experts - themselves former members of government security agencies - who share their insights to help enhance performance.

Secure connection to Cybergym's Virtual Arena

Participants securely log in to our arena in the cloud from their laptops, whether at the office, or at home, anywhere in the world.

Virtual Cloud Arena

At Cybergym, we specialize in developing and delivering the most up-to-date cyber awareness and response training, to enhance the cyber readiness of your personnel. To make our specialized training available to SMEs anywhere in the world, we have adapted our programs to a remote learning environment through an innovative training ground: the Virtual Cloud Arena.

In a package that is both affordable and convenient, the Virtual Cloud Arena experience gives multiple users online access to a cyber training program that has been tailored to the skill and experience of teams across your organization. Using a secure connection, your employees can participate in the training from their laptops, whether at the office, or at home, anywhere in the world.

Supported by our White Team experts, trainees undergo a hands-on experience in defending your systems against a range of cyberattacks, based on real-life scenarios and adapted to your actual work environment, infrastructure and technology. Training is powered by our Red Team of hacking experts - themselves former members of government security agencies - who provide real-time and post-training feedback and insights to help enhance performance.

Virtual Cloud Arena

Training Programs Available Remotely

Cybersecurity Awareness Essentials

General employees, IT operational professionals and software developers gain a broad overview of the cybersecurity industry, and insight into critical topics such as threats, attacks and dangers.

Cyber Crisis Management for Executives

Your management are given the background information, skills and concepts required to successfully manage a cyber crisis in your organization.

SOC Intrusion Detection Tactics

A series of hands-on exercises in which your experts develop the essential skills required to anticipate and prevent a cyberattack.

Advanced Forensics Collections

A first-hand experience of the internal mechanisms of a complex malware scenario, for your cyber-security teams.

Incident Response Principle Tactics

your SOC team gains in-depth knowledge of incident response concepts and tools, enabling them to manage, investigate and analyze real-life cyber incidents.
