CybergymIEC

CyberGround

Cyber train and qualify your entire organization, at your own premises, with one comprehensive solution

Comprehensive range of programs

Designed to suit the existing cyber awareness and skill level of people across your organization, from general employees, to executives and senior managers, to IT/OT and cybersecurity professionals.

Hands-on experience

Impactful training, based on real-life scenarios adapted to your actual work environment, infrastructure and technology, in which your personnel learn to detect, contain and mitigate complex, persistent cyberattacks on your organization.

Full access to World Cyber Warfare Arena (WCWA)

Your international teams enjoy use of our global network of training facilities, equipped with emulated OT/IT rooms, access our centers of excellence specializing in different verticals, and connect to CybergymIEC's Knowledge & Intelligence Center.
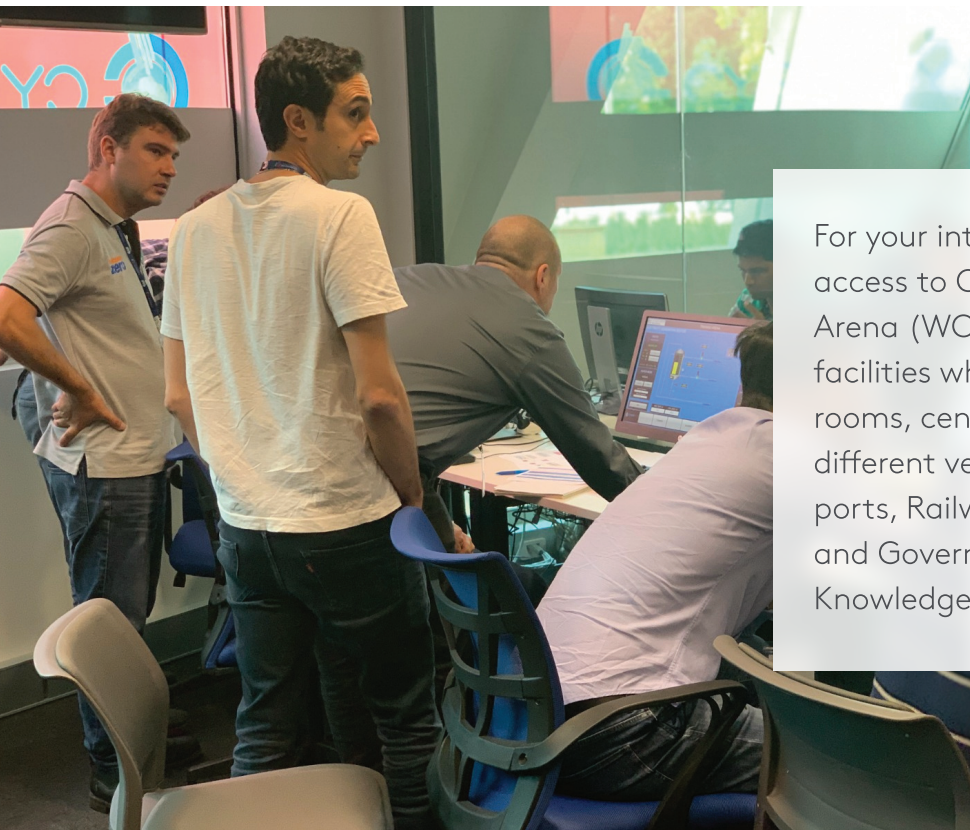

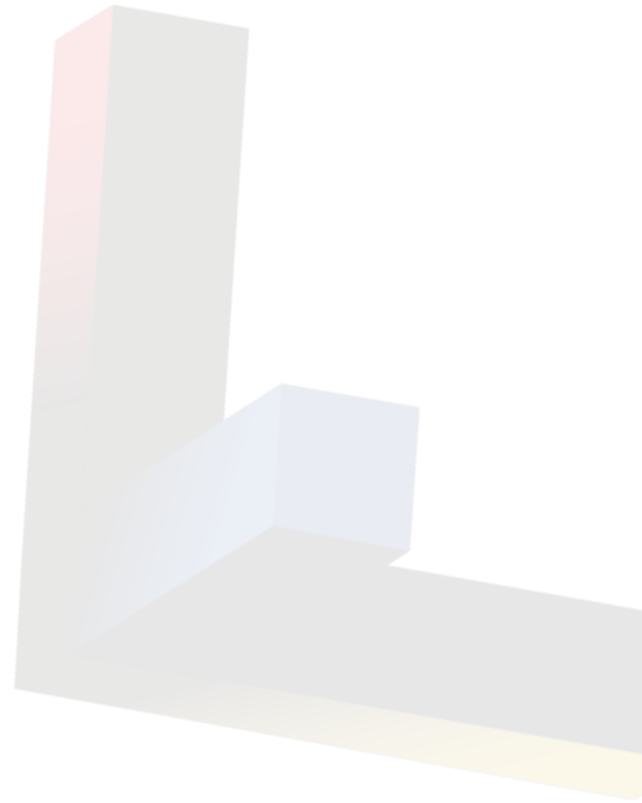

Independent operation

Monetize the CybergymIEC training concept as you decide who can access training at your facility, which courses to offer, and when.

CyberGround

CyberGround is a training arena facility where your personnel gain hands-on experience in detecting, containing and mitigating cyberattacks on your organization.
Ranging from Basic Awareness for your general employees, to Crisis Management for your executives and senior managers, to Advanced SOC-Intrusion Detection Tactics for your IT/OT and cybersecurity professionals, our training programs have been designed to suit the existing cyber readiness and skill level of people across your organization.
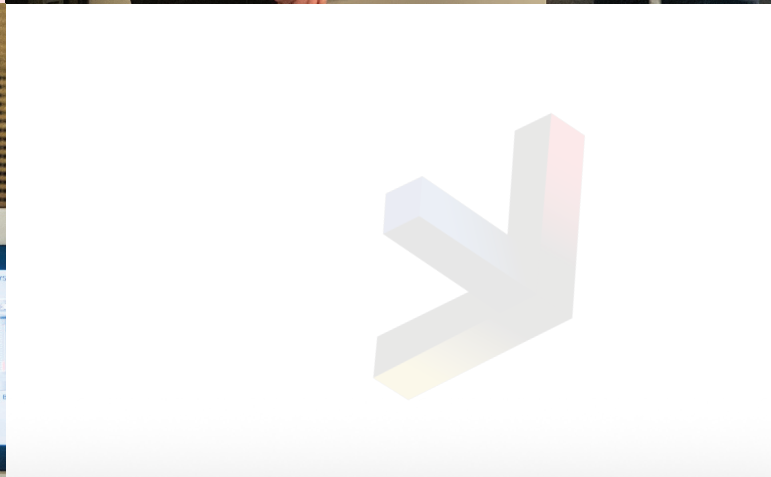

In an environment based on your own technological environment, participants will encounter scenarios based on real-life cyberattacks, facing complex, persistent challenges that will push them to their limits.

For your international teams, you also get full access to CybergymIEC's World Cyber Warfare Arena (WCWA), our global network of training facilities which is equipped with emulated OT/IT rooms, centers of excellence specializing in different verticals - Critical Infrastructure, Airports, Railways, Oil&Gas, Finance, Universities and Governments – connected to CybergymIEC's Knowledge & Intelligence Center.

CyberGround

The OT Experience

A cyberattack on your operational technology - the hardware and software that monitors and controls how physical devices perform - can be devastating to your entire organization. CybergymIEC's game-changing OT training demonstrates complex cyberattacks on these critical assets, giving your personnel the skills they need to identify, contain and mitigate a diverse range of attack scenarios on industrial control systems.

Developed in collaboration with the IEC, Israel's electric company, our OT training is carried out on highly-complex operational infrastructure. Emulating your industrial control system networks, the model covers relevant operational and organizational network infrastructures, including OT firewalls, HMIs (human-machine interfaces), PLCs (programmable logic controllers), HVACs (heating, ventilation, and air conditioning) and more.

CyberGround

Specifications

Training Level	Basic Awareness –> Advanced
Personnel Requirement – Client Side	Trainers & Technical
Personnel Delivered by CybergymIEC	Knowledge Transfer Project (Train the Trainers)
Facility Requirements	300-400m² (Training rooms + IT/OT environment)
No. of Trainees	Up to 25
No. of Simultaneous Training Sessions	Unlimited
Support Availability	24/7
Value-added Services	As required – a coupon may be purchased for specific value-added services, or an annual subscription may be purchased.
Access to World Cyber Warfare Arena database, marketing tools and CybergymIEC's different sites for certain optional off - site training	✔

Is CyberGround right for you?

Our platform has been designed to suit the needs and capacity of:

- Mid-size corporates
- Service providers
- Governments
- Integrators

with facilities across multiple sites.
